# LA SG40WP1

Light Avenue Premium Edition LED series is designed for high performance consumer applications. Remarkable light extraction is reached by a particular top emitting design with vertical chip structure. As this die can be driven at very high currents compared to the chip size, an outstanding cost vs. performance ratio can be obtained.

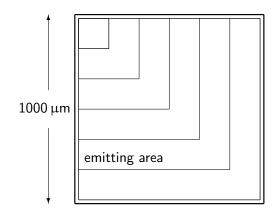

#### **Features**

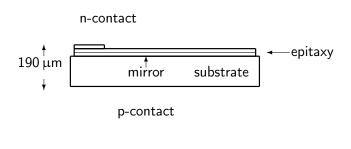

- Highest brightness InGaN chip
- Top emitting device
- Lambertian radiation
- Optimized for SMT applications
- Grouping: luminous intensity, wavelength
- Chip with 5 contact rings

# **Applications**

- Solid state lighting
- LCD backlighting
- Lamps
- Displays
- Light indicators

#### Delineation

## Mechanical characteristics

DESCRIPTION		MINIMUM	$Typical^1$	Maximum			
Chip size	(µm)	950	1000	1050			
Chip height	$(\mu m)$	170	190	210			
Bond pad diameter	$(\mu m)$	160	180	200			
Top contact		Cathode (n), gold					
Bottom contact		Anode (p), gold					
Die attach		Epoxy bonding

	> 20000	A50	AM50	B50	BM50	C50	CM50	D50	DM50

#### Notes:

- The usage of LEDs in life-support devices or systems has to be expressly and written authorized by the supplier!
- Dice are sensitive to ESD.
- Dice are shipped on blue foil with or without frame and have therefore to be stored between 15 and 30°C and below 60% relative humidity.
- Lead free product RoHS compliant.
- The information in this document is subject to change without notice and describes the die generally. It shall not be considered as assured characteristics or detailed specification.

# LIGHT AVENUE® LA SG40WP1

#### Premium Edition Standard Green 40 mil

- The quality level of the final visual inspection shall comply to an AQL of 1.0 (according to MIL-STD-105E, level II), if the customer performes an incoming visual inspection of a shipment.
- All chips are checked according to the "Failure Catalog of Light Avenue dice" dated 2009-11-14. If this document is not familiar to you, please request it at your next sales office.

Version 1.0 3 12.05.2010

<sup>&</sup>lt;sup>1</sup>Typical (Typ) data are defined as long-term production mean values. These values are not specified and only given for information.

<sup>&</sup>lt;sup>2</sup>Measurements are done with an accuracy of  $\pm 15\%$ . Correlation to customer's equipment and products is required.

<sup>&</sup>lt;sup>3</sup>Maximum ratings are package dependent and may differ between packages. The forward current is not limited by the die but by the effect of the LED junction temperature on the package. If you need more information on pulsed operation, please contact your next sales office about possible driving conditions. If not otherwise specified the maximum pulse current may not exceed the maximum current in continuous mode.

<sup>&</sup>lt;sup>4</sup>There may be more than one bin on one single foil. Single bins cannot be ordered.
